

AUDIOLOGY REFERRALS

****IMPORTANT – PLEASE REVIEW****

When referring a patient to Confluence Health's *ENT (Ear Nose Throat or Otolaryngology)* department, please be aware that a referral must also be placed with *Audiology* for the following diagnoses:

- Bell's Palsy
- Chronic otitis media
- Ear pain (otalgia)
- Ear popping
- Ear tube check
- Eustachian tube dysfunction
- Exostosis
- Fluid in ears
- Hearing loss
- Labyrinthitis
- Otosclerosis
- Perforation of tympanic membrane
- Plugged ears
- Speech delay
- Tinnitus
- Vertigo or dizziness

Please follow through with these requests as our ENT doctors need our audiologists to perform an *audiogram* and/or *tympanogram* to help with diagnosis and treat patients as efficiently as possible. Also, please note that prior to our visit with our mutual patient, we will need all pertinent imaging and reports sent to our office via fax or PACS. If you have any further questions or concerns, please contact our office at:

Phone: (509) 436-4974

Fax: (509) 436-3016

Thank you in advance for your cooperation and the opportunity to assist you in the care of your patients.
