“Not your father’s hearing aid”

Jan. 16th

What comes to mind when you think of a hearing aid? A clunky beige piece of plastic that squeals when you touch it? Not anymore! Hearing aid technology has come a long way. From Bluetooth connections, directional microphones, rechargeability, and even real-time language translation and fall detection, the world of hearing aids is not what it used to be.

Wednesday at Noon - Lunch Included
In the Miller Street Conference Room

1000 North Miller Street • Wenatchee, WA 98801
