ONCOLOGY SERVICES

OFFERING COMPREHENSIVE CANCER CARE CLOSE TO HOME

We are proud to offer advanced PET imaging services to provide our community with accurate, timely, and personalized cancer care.

PET/CT Scan

- **A PET/CT Scan** combines two imaging tools to provide a complete picture and show how tissues and organs are functioning and give detailed images of anatomy. This imaging modality helps detect cancer early, pinpoint exact location and monitor how well treatment is working.

This type of imaging is used for multiple types of cancers including lung cancer and lymphomas.

Access: 3 weeks out

PET PSMA

- **PET PSMA scan** is a highly advanced imaging test designed to specifically detect prostate cancer. It uses a special tracer that binds to PSMA a protein found in high amounts on prostate cancer cells. This scan can find cancer even when other imaging tests can miss it, making it very valuable for men with rising PSA levels or those being evaluated for recurrence or for treatment planning.

Access: 3 weeks out

PET Dotatate

- **PET Dotatate Scan** is specifically developed for patients with neuroendocrine tumors. It uses a targeted tracer that binds to somatostatin receptors commonly found on these tumors, allowing for precise imaging. This scan helps locate tumors, assess their spread, and determine the most effective treatment plan tailored to each unique case.

Access: 3 weeks out

ONCOLOGY ACCESSIBILITY

Please reach out to our Oncology/Hematology Intake Coordinator for up-to-date information regarding patient access.

NEXT HIGH PRIORITY APPT. (1-2 weeks out)

NEXT ROUTINE APPT. (3 weeks out)

**First appointment may be in Wenatchee, but only for the initial consultation*

MOSES LAKE RADIATION ONCOLOGY CENTER

We are thrilled to share a glimpse into our new Radiation Oncology Center in Moses Lake, which opened back in October of 2023, and has given us the ability to provide full-spectrum cancer care in the Columbia Basin.

This new facility will help patients undergoing radiation therapy, who previously would have needed to travel to Wenatchee, Spokane, Seattle, or other locations for treatment. This allows them to get their needed care closer to home and their support network of family and friends. We are so excited to be able to offer this state-of-the-art care right in the Columbia Basin. We can never thank the Moses Lake community enough for their fund-raising efforts that were critical in the completion of this facility.

Please click or scan the QR Code to see how we are working together to fight cancer and improve lives.

Featured DEPARTMENT

ORTHOPEDICS

At Confluence Health, we believe that timely access to specialized orthopedic care is essential for restoring mobility and improving quality of life. Our orthopedic department is proud to offer comprehensive services across subspecialties including total joint replacement, sports medicine, hand and upper extremity care, foot and ankle surgery, and trauma recovery.

We are actively hiring new physicians to expand our capacity and reduce wait times for patients seeking elective procedures and surgical care.

Please contact us below to submit a referral, or through EpicCare Link on our [website](#).

PHYSICIAN spotlight

SEAN CASKEY, DO is a fellowship trained orthopedic surgeon specializing in joint replacement surgery of the hip and knee. He is dedicated to delivering individualized treatment plans to help his patients live pain free and enjoy more active lives.

Dr. Caskey is trained in the latest treatments and techniques in hip and knee replacement surgery as well as complex revision surgery. Throughout his extensive experience he has utilized technology, robotics, and minimally invasive approaches. He performs partial and total knee replacement surgeries as well as both direct anterior muscle sparing and posterior total hip replacement. He is an active member of the American Academy of Orthopaedic Surgeons as well as the

American Association of Hip and Knee surgeons and is a diplomate of the American Board of Orthopaedic Surgery.

Prior to joining Wenatchee Valley Medical Group, Dr. Caskey completed his residency in Orthopedic Surgery at McLaren Flint- Michigan State College of Human Medicine where he gained valuable experience in both operative and nonoperative management of orthopedic conditions. Following completion of his residency, he spent an additional year completing a subspecialty fellowship in Adult Reconstruction and Hip and Knee Replacement at the University of Minnesota. His goal is to keep expert care and evidence-based medicine here in Wenatchee.

Dr. Caskey is very active and enjoys skiing, hiking, fishing, and spending time with his young family, which give him insight into the importance of his role in improving mobility in patients. He believes in establishing a genuine relationship with his patients and takes pride in helping them regain independence from hip and knee pain.
