Strengthening Care Through Trusted Partnerships

FALL 2026 / ISSUE 2

Exciting Updates for our Communities

NEW CANCER CENTER

We're pleased to share that Confluence Health is currently developing a new Cancer Center at our Central Campus—a generational investment in expanding access to comprehensive, compassionate, and community-driven cancer care right here in North Central Washington.

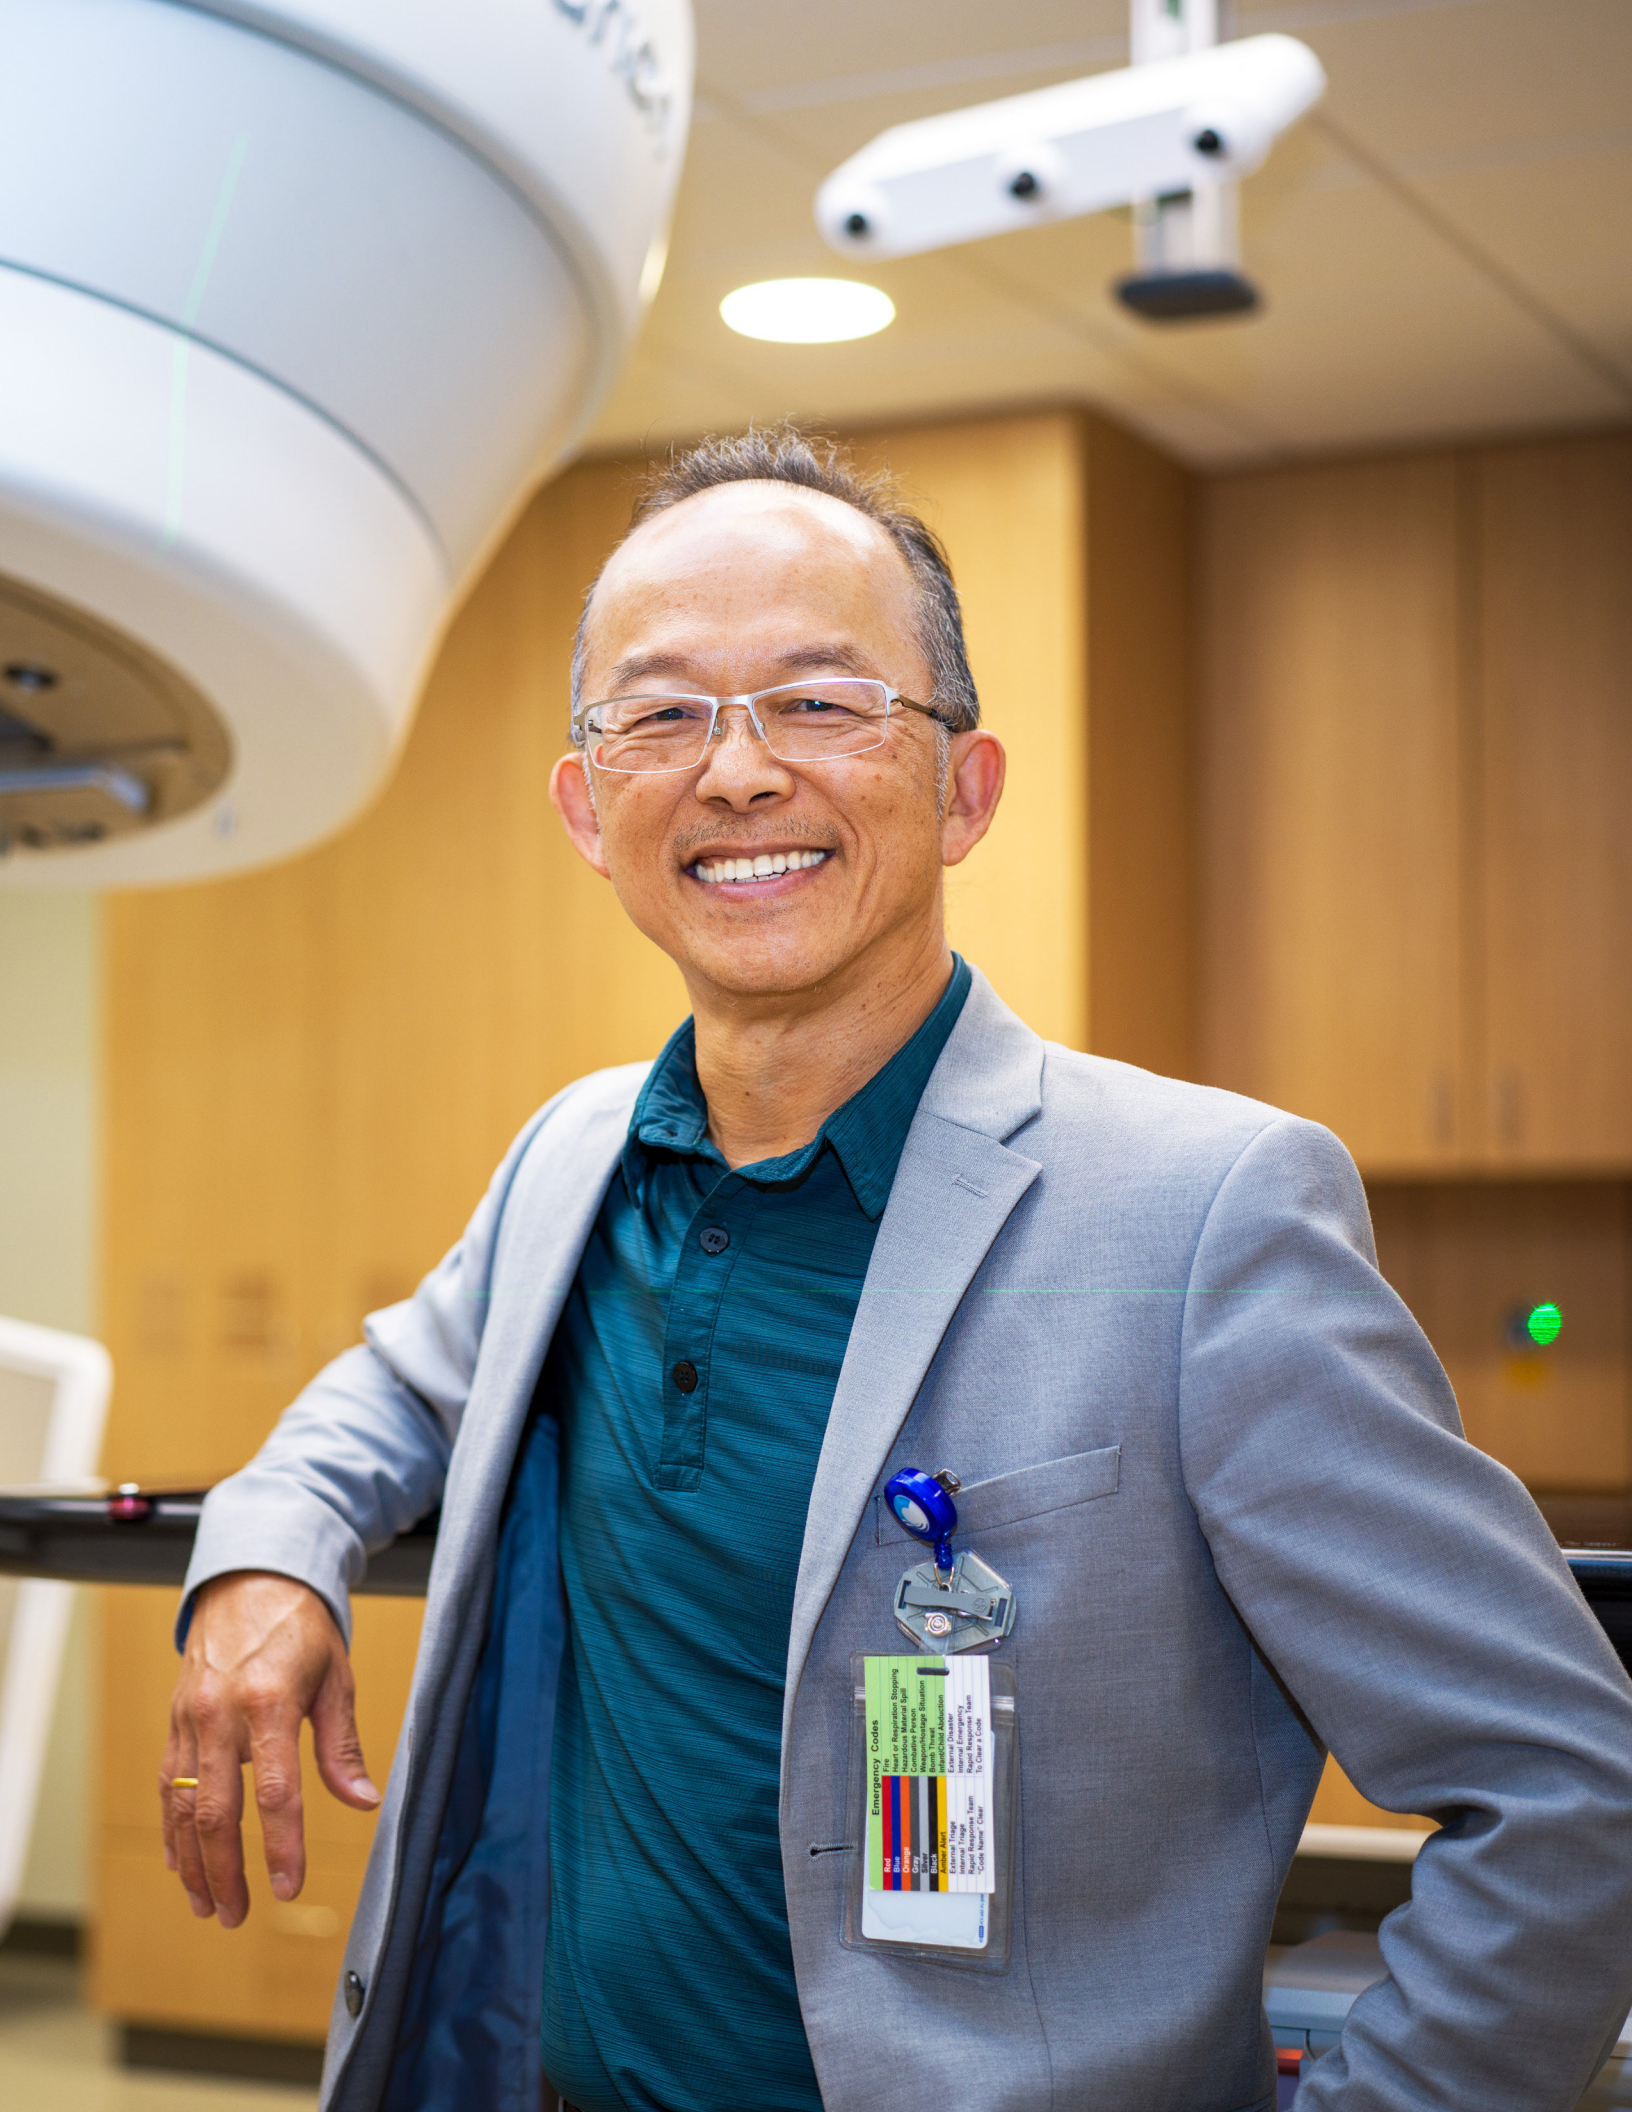

This new facility is designed to ensure that patients can focus fully on their treatment and healing, without the added burden of long travel or time away from their support systems.

What This Project Will Bring to Our Region

- **More space** to meet the growing need for cancer services
- **Coordinated care**, with cancer specialists and services united under one roof
- **Improved access** and experience for patients and families

Construction is anticipated to begin January 2026, with the first patients expected in mid-2028.

Scan the QR code to learn more about how this will impact our communities.

Welcoming Dr. Roscoe Chan

TO CONFLUENCE HEALTH RADIATION ONCOLOGY

We are pleased to welcome **Dr. Roscoe Chan** to Confluence Health Radiation Oncology at our Moses Lake campus. Dr. Chan brings more than three decades of experience in radiation oncology, with extensive expertise in advanced radiation treatment techniques and a longstanding commitment to delivering personalized, patient-centered cancer care.

Dr. Chan earned his medical degree from the **University of Hong Kong** in 1989 and completed his Radiation Oncology training at the **University of Western Ontario, Canada**, in 1996. He is board certified in both **Canada and the United States**, having achieved certification from the American Board of Radiology in 1997. He later expanded his clinical expertise by earning a **Medical Acupuncture certification from UCLA** in 2009.

Early in his career, Dr. Chan served as an Assistant Professor at the **University of Texas**, and was recognized as **“Teacher of the Year.”** He subsequently transitioned to

community oncology practice, caring for patients at **Christus Schumpert/Highland Cancer Treatment Center in Shreveport, Louisiana**, from 2001 to 2020.

In addition to his clinical expertise, Dr. Chan places a strong emphasis on **collegiality, teamwork, and multidisciplinary collaboration**. He is committed to fostering an environment where providers work together to deliver the highest quality care and ensure the best possible outcomes for patients.

We are excited to add Dr. Chan’s experience, leadership, and collaborative approach to our oncology team and look forward to supporting referring providers and their patients throughout North Central Washington.

ONCOLOGY ACCESSIBILITY

Please reach out to our Oncology/Hematology Intake Coordinator for up-to-date information regarding patient access. **Guinevere Jardine**

Expanding Spine and Brain Surgery Capabilities

ACROSS NORTH CENTRAL WASHINGTON

Confluence Health is expanding access to advanced surgical care for both spine and brain conditions, bringing more precise, patient-focused treatment options closer to home. Our goal remains the same—providing effective care that supports safer procedures and a quicker return to daily activities.

What This Means for Your Patients

Advancements in imaging, navigation, and surgical technology are transforming both spine and brain surgery. These tools allow for greater precision, improved visualization, and more informed decision-making during procedures.

For spine surgery, robotic navigation using the ExcelsiusGPS® platform enables detailed preoperative planning and real-time guidance to support accurate implant placement. In brain surgery, high-resolution imaging and precision-guided techniques allow for careful planning and targeted treatment while minimizing impact to surrounding tissue.

Broad Capabilities Across Spine and Brain Care

Our neurosurgery team provides comprehensive care across a wide range of conditions affecting the spine and brain, including both complex and routine cases.

Brain Conditions:

- Brain Tumors
 - Glioma, Glioblastoma, Brain Metastasis, Meningioma, Schwannoma, Acoustic Neuroma, Pituitary Tumors and Rathke Cysts, Ventricular Tumors, Ependymoma, Colloid cysts, Epidermoid cyst
- Trauma
- Infections

Spine Conditions:

- Disc Herniations, Spinal Stenosis, Spondylolisthesis, Spine Tumors, Spinal Cord Tumors, Meningioma/Schwannoma, Spine Metastasis, Spinal Cord Syringa, Spinal CSF Leaks, Trauma, and Infections

Nerve Conditions:

- Trigeminal Neuralgia, Hemifacial Spasm, and Vagal Nerve Stimulation

Spinal Cord Disorders:

- Myelopathy and spinal cord compression

Cerebrovascular Conditions:

- Aneurysms, Arteriovenous Malformations (AVM), Cavernomas, Dural Arteriovenous Fistulas

Across both spine and brain surgery, our approach is focused on selecting the right treatment for each patient,

with the goal of reducing complications and helping patients return more quickly to their daily lives.

Partnering with You

We are committed to expanding access to specialty neurosurgical care across our region and supporting our referral partners with advanced treatment options close to home.

If you have patients who may benefit from a spine or brain evaluation or surgical consultation, our team is here to collaborate on next steps.

Orthopedics Department Highlight

WELCOMING DR. KURT STOLL, MD

We're excited to welcome Dr. Kurt Stoll, a fellowship-trained shoulder and elbow specialist, to Confluence Health Orthopedics. Dr. Stoll joined our team in July, helping to expand access for sports medicine—particularly shoulder and elbow care. This additional coverage will help reduce wait times and provide more options for patients who need specialized orthopedic care. Dr. Stoll will continue to further strengthening our Sports Medicine and Orthopedics services and ensuring continued access to expert care close to home. We're pleased to bring another highly trained provider to our region and look forward to the impact this will have for patients and referring partners alike.

Please contact us below to submit a referral, or through EpicCare Link on our website.

INNOVATION & ROBOTICS

ADVANCING SURGICAL INNOVATION ACROSS OUR REGION

DA VINCI 5 (DV5)

We are continuing our commitment to cutting-edge care with major advancements in robotic and image-guided surgery. With the addition of the new da Vinci 5 (DV5) at our Central Campus, we now offer robotic surgery at both our Central and Mares campuses, expanding access to minimally invasive procedures and enhancing patient outcomes across North Central Washington.

ROBOTIC SPINE NAVIGATION & IMAGING

OUR EXCELSIUSGPS™ robotic navigation system—the first and only platform offering a fully integrated, start-to-finish approach to spine procedures—supports highly accurate screw, implant, and instrument placement. Paired with Excelsius3D,™ surgeons can utilize real-time 2D and 3D imaging through a single system that combines digital X-ray, fluoroscopy, and 3D visualization for exceptional precision in the operating room.

ADVANCED CRANIAL & SINUS NAVIGATION

We also continue to expand our advanced ENT and neurosurgical capabilities through **STEALTH™** navigation technology, which transforms each patient's MRI or CT into a detailed 3-D model. Using GPS-like guidance, surgeons can navigate with remarkable accuracy—supporting safer, more precise sinus and brain procedures.

These innovations underscore our commitment to delivering best-in-class surgical care, improving patient outcomes, attracting top clinical talent, and ensuring that the most advanced treatments remain accessible—**right here at home.**
